

OBJECT ORIENTED PROGRAMMING LAB

Experiment No.: 3

Aim

Program to add complex numbers

Name: ATHUL VINAYAKUMAR

Roll No:5

Batch: MCA B

Date:06/04/2022

Procedure

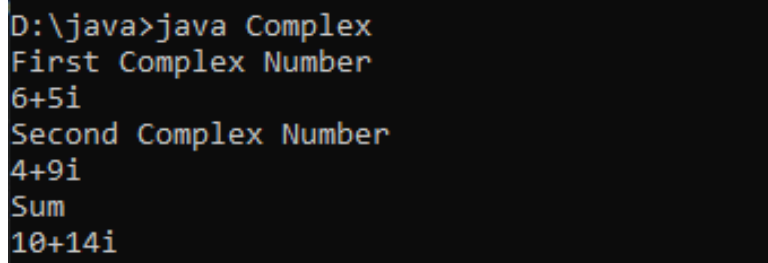

```
import java.util.*;

class Complex {
    int real, imaginary;
    Complex(){ }
    Complex(int tempReal, int tempImaginary)
    {
        real = tempReal;
        imaginary = tempImaginary;
    }
    Complex addComp(Complex C1, Complex C2)
    {
        Complex temp = new Complex();
        temp.real = C1.real + C2.real;
        temp.imaginary = C1.imaginary + C2.imaginary;
        return temp;
    }
    Complex subtractComp(Complex C1, Complex C2)
    {
        Complex temp = new Complex();
        temp.real = C1.real - C2.real;
        temp.imaginary = C1.imaginary - C2.imaginary;
```

```
        return temp;
    }
    void printComplexNumber()
    {
        System.out.println("Complex number: "
                            + real + " + "
                            + imaginary + "i");
    }
}

public class GFG {
    public static void main(String[] args)
    {
        Complex C1 = new Complex(3, 2);
        C1.printComplexNumber();
        Complex C2 = new Complex(9, 5);
        C2.printComplexNumber();
        Complex C3 = new Complex();
        C3 = C3.addComp(C1, C2);
        System.out.print("Sum of ");
        C3.printComplexNumber();
    }
}
```

Output Screenshot

```
D:\java>java Complex
First Complex Number
6+5i
Second Complex Number
4+9i
Sum
10+14i
```
